

sidecar spare parts

october 2010

IDEAL – Motorräder & Seitenwagen GmbH
Köpenicker Straße 8 · D – 10997 Berlin / Germany · tel: +49 (0)30 / 618-6258 · fax: +49 (0)30 / 611-7002
mail: info@ideal-seitenwagen.de · url: www.ideal-seitenwagen.de

Business hours: Monday to Friday 10:00 a.m.-17:00 p.m. · Saturday 10:00 a.m.-13:00 p.m.

Terms of Delivery

Spare parts are shipped within 3 days after receipt of order. Packing costs are determined by package size and usually run between 1,54 € and 9,13 €. Shipping and handling costs including insurance are assumed by the customer. If you require more than the standard insurance we will arrange that for you.

Please note that we have to bend alu trimmings for shipping!

All prices are quoted with tax included (19% VAT). For Customers outside of European Union (EU) we will be happy to prepare an export certificate or deliver for the Netto price. We reserve the rights to price changes. Estimates are subject to change and not binding. Legal jurisdiction for all matters is Berlin, Germany.

Payment Terms

All orders are sent after receipt of payment or bank transfer. If you wish we accept C.O.D. (cash on delivery).

All merchandise remains property of this company until payment in full is received.

Warranty Terms

All spare parts are carefully produced and inspected before packing. If there is a problem, we will exchange or refund your money. The guarantee does not extend to parts damaged due to faulty installation by the customer.

All parts carry a 6 month normal wear guarantee. All returned or exchanged merchandise which does not fall under the guarantee terms are subject to a service fee of 10% of the purchase price or 15 € minimum and any other costs incurred in the return or exchange of said merchandise is the responsibility of the customer.

RS 1

T 1

We manufacture original facsimiles from STEIB LS 200, S 350, S 500 and TR 500 just like those produced in Nürnberg in the mid-50's. STEIB sidecars were offered as standard equipment for Motorcycle firms from that era. All components are exact copies and compatible with the original STEIB models.

Our order numbers are based on the system of the original STEIB catalogue. This will help you to find the required parts for the restoration of your sidecar.
Reprints of the original STEIB catalogues are available – ask for them!

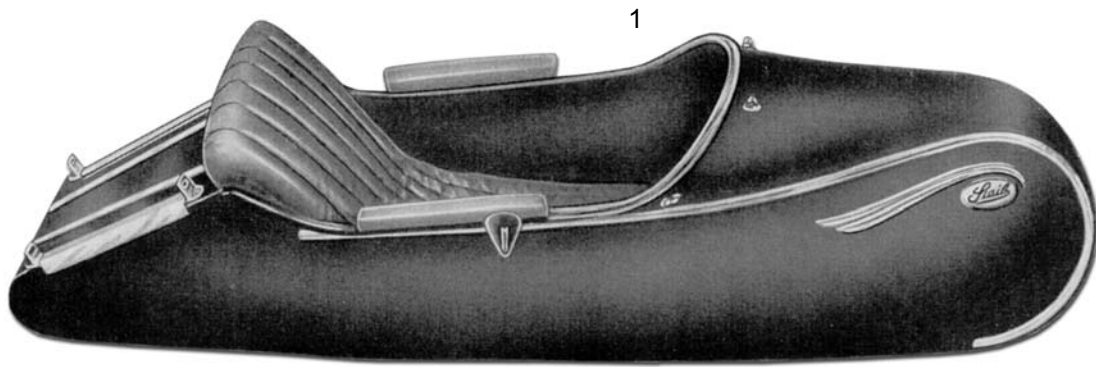

We deliver connecting parts, frames, reinforced springs and spoke wheels for a wide variety of motorcycles. We supply a extensive selection of spares for BMW R 24 – R 27, R 50 – R 69 S and R 51/2 – R 68. For pre-war BMW, HOREX Regina, EMW and AWO we offer the most often requested parts.

Feel free to ask about parts you don't find in our catalogue. We will make an offer suitable to you.

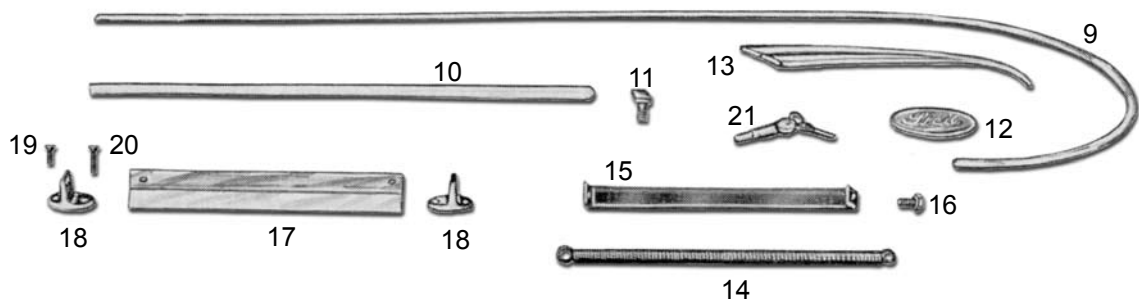

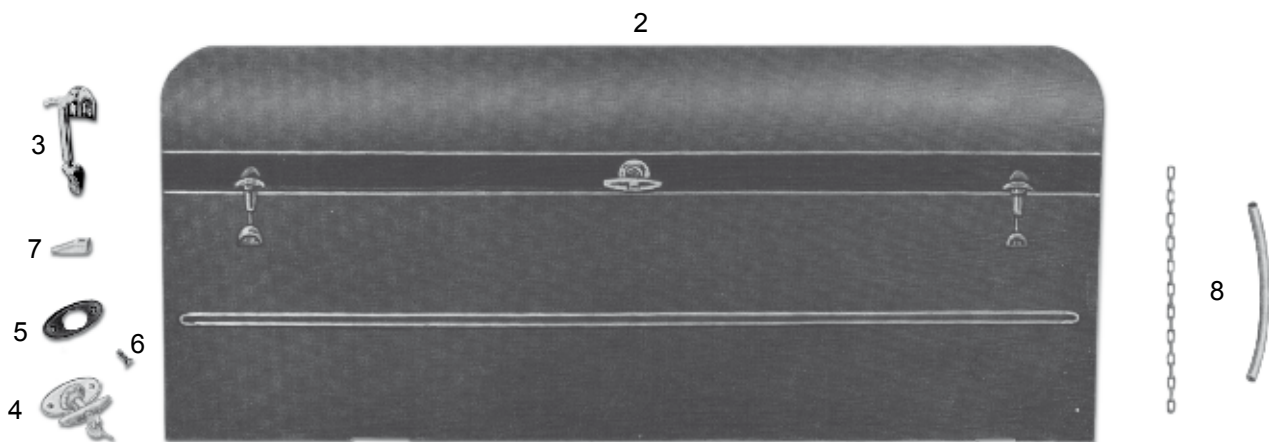

Actual information can be found on our homepage www.ideal-seitenwagen.de!

adapter frame for BMW Boxer 1969-96

information

General information

All of this models can be outfitted with sidecars. An adapter frame, screwed to the right side of the motorbike, makes it possible. In most cases a 4-point-connection is used. The adapter frame is made of welded steel pipes and is connected with adjustable clamps (to avoid applied tensions) to the motorbike frame. The adapter frame has two upper socket-joints and two lower flat bolts. The clamps and screws are zincked, the frame is black powder laminated and is outfitted with a registry number. The adapter frame, once mounted can remain on the motorbike when the sidecar is not in use.

Security information

- + Each adapter frame is TÜV (german state technical inspection) certified. This inspection certificate is available.
- + Generally casted rims are not accepted for use with sidecars by the german TÜV and therefore we do not recommend them.

Technical requirements

- + Installation time: approx. 1 – 2 hours.
- + This BMW models are not recommended for sidecar use:
BMW /5: frames are less stable (reinforcement of the steering heading is possible through alteration in a professional workshop).
BMW R45: no shorter transmission available.
- + The original tele-front forks are more susceptible to wear. It is recommended using a sleeve to give more tension to the front springs.
- + A front wheel swinging arm adds stability and is widely available. It generally costs about 1.500 €.
Hydraulic steering dampers are recommended for use on both suspension systems to avoid shimmying.
- + The back wheel suspension can be reinforced by stronger springs. For later GS-models a sleeve is adequate for extra support. Early G/S, with short swinging arm, should be equipped with a high quality spring (ex. Wilbers, White Power,...).

Adapter frames

There are three types of BMW Boxer. Each one requires a different adapter frame:

/5 to /7 distinguishable by its oval frame pipe underneath the steering heading.

Typ 247 all models up to the R100R/1996; GS with foldable footrests, distinguished by its round frame tubes, 32 mm diameter. The last GS has a shorter frame, the adapter requires a slight adjustment.

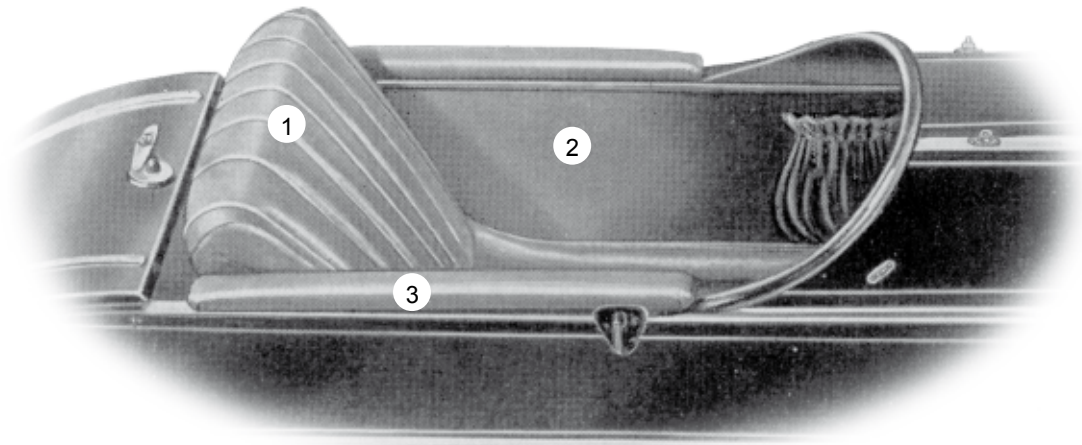

Typ 248 all R 45 and R 65

All 3 adapter frames are designed for use on BMW Boxer models with standard gas tank size. We offer special adapter frames for larger gas tank sizes.

Adapter frames for other motorcycles are also available on request!
